Bootstrap Jumbotron

In this tutorial you will learn how to use Bootstrap jumbotron component.

Showcasing Contents with Jumbotron

The Bootstrap jumbotron component provides an excellent way to showcase the key content or information on a web page. Just wrap your featured content like heading, descriptions etc. in a `<div>` element and apply the class `.jumbotron` on it.

Example

Try this code »

```
1 <div class="jumbotron">
2   <h1>Learn to Create Websites</h1>
3   <p class="lead">In today's world internet is the most popular way of connecting
    with the people. At <a href="https://www.tutorialrepublic.com"
    target="_blank">tutorialrepublic.com</a> you will learn the essential of web
    development technologies along with real life practice example, so that you can
    create your own website to connect with the people around the world.</p>
4   <p><a href="https://www.tutorialrepublic.com" target="_blank" class="btn btn-
    primary btn-lg">Start learning today</a></p>
5 </div>
```

— The output of the above example will look something like this:

Learn to Create Websites

In today's world internet is the most popular way of connecting with the people. At [tutorialrepublic.com](https://www.tutorialrepublic.com) you will learn the essential of web development technologies along with real life practice example, so that you can create your own website to connect with the people around the world.

Start learning today

Creating Full Page Width Jumbotron

To create a jumbotron without rounded corners and that covers the full width of the viewport, place it outside all the containers, add the `.jumbotron-fluid` modifier class on it, and add a `.container` or `.container-fluid` within it, as shown in the following example:

Example

Try this code »

https://www.tutorialrepublic.com/twitter-bootstrap-tutorial/bootstrap-jumbotron.php

1/2

```
1 <div class="jumbotron jumbotron-fluid">
2   <div class="container">
3     <h1>Learn to Create Websites</h1>
4     <p class="lead">In today's world internet is the most popular way of
      connecting with the people...</p>
5     <p><a href="#" class="btn btn-primary btn-lg">Start learning today</a></p>
6   </div>
7 </div>
```
